

LampOda B

Designer

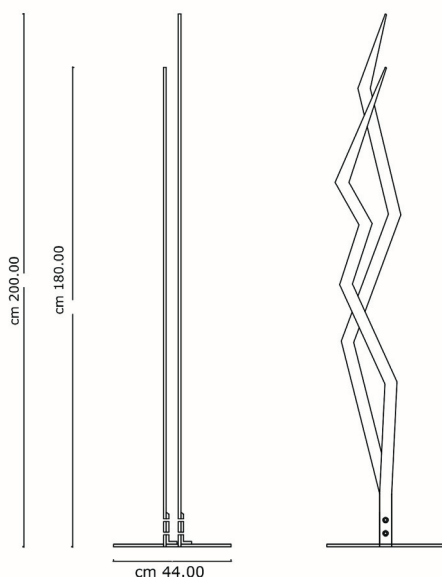

» M. Pisani & A. Vitolo

An object of light design that interprets with formal rigidity and elegance the aesthetic values of Italian futurism: dynamism, speed, strength

LampOda incorporates the source of light into its very structure and creates an immediate and appealing relationship between the graphic sign, the concept and the function of the electrical phenomenon seen as an energy charge and a link between earth and sky.

The choice of polished steel gives a definite character and a strong presence to this metal furnishing item by reflecting the surrounding space even without switching on the LED, and amplifies the effect of the activated light source. LampOda is an bolt of light that spreads its vital energy to connect all the other furnishing items in the room, becoming a point of attraction and the visual center of gravity.

Features

Materials: » Stainless Steel and matt black MDF

Finishes: » Mirror

» Gold-dipped mirror

Measurements: » Element n°1: (44 x h 180) cm

» Element n°2: (h 200) cm

Light source: » Indoor Lighting LEDs - 6000K white
