

# Wall-mounted FAVO

## Designer

» Daniele Della Porta

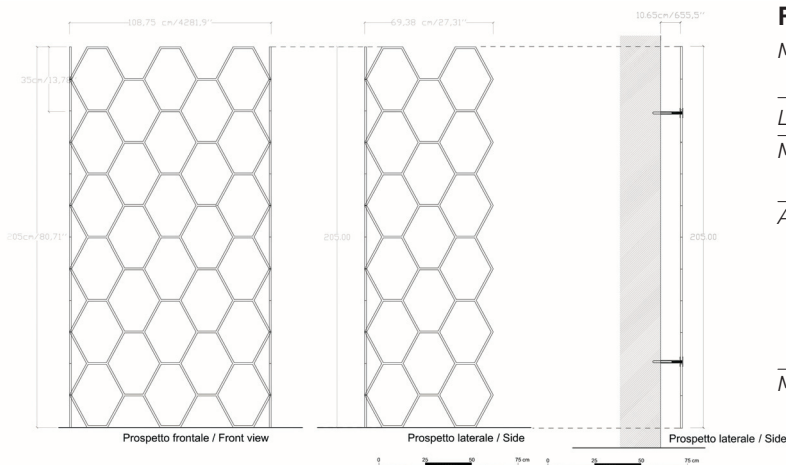

### The nectar of design

A honeycomb-shaped furnishing component made of brass or steel rods.

FAVO is suitable for various modular compositions. It can be used individually on a wall, or hinged for freestanding use.

Like cells of a large beehive, geometric elements are arranged to create different unique, elegant furnishing items to suit the functions and space where they are placed. It can be used as a console, coat rack, shelf, book holder, for a living room, study hall, bathroom wall.

FAVO is complemented and embellished by a collection of wooden, fabric and metal accessories.
