COSTELLAZIONI: clothes hanger

July 2018

Introducing 'Costellazioni'

Lamberti Design launches COSTELLAZIONI, a revisit of the classic rhomboid hanger with the accordion opening mechanism.

COSTELLAZIONI is the winner of the first contest "Young Factory Design" organized by the group "Design, Tessile, Sistema casa" of Confindustria Salerno.

With this project Lamberti Design begins a new collaboration with the architects authors of the product. Costellazioni streamlines the original design, emphasizing the elements of support. It can assume many configurations, five of which are chosen by the designers. The Great Bear shape was the inspiration for the product name.

Constellazioni is available in stainless steel with brushed, polished or etched finishes, and in brass, polished, satin or etched. A mirror can substitute one of the circular knobs to customize and enrich the entrance of a room.

A. Memoli, P. Casaburi and M. L. Nobile -The architects-

Antonietta and Paolo are extremely bound to nature, through the passion for the mountain, the sea..She is passionate about yoga, he is passionate about mountain sports. In their planning and designs they search for balance between the inner world of the individual and the outside world, between the need for nature, simplicity and a contemporary style.
