

# ▲ AEGIS -P- The console

## Designer

» Ziad Alonaizy

The AEGIS collection has an elegant simplicity that conceals a plethora of complexities, marrying four different elements: marble, steel structure, brass plates and metal wires. The collection includes nesting tables, consoles, mirrors with a common design thread: the golden steel wires carefully sawn by hand. The inspiration comes from the protection, shielding, and supporting idea of the wires "aegis". The contemporary console table is made of white-pink marble, vintage polished golden steel frame and polished brass plates. Upon request, each piece can be customized in material, finishes and dimensions.

### Characteristic

Materials:	>> Marble >> Steel >> Brass
Finishes:	>> Vintage gold polished >> Polished brass
Type of environments:	>> Indoor use
Sizes:	>> ( 1280 x 360 x 840) mm
